

## COST EFFICIENCY ANALYSIS

**Breakaway Services** manually reviews all voice and data telecommunication expenses for cost efficiency. This is a comprehensive analysis that will uncover costly waste that cannot and will not be identified by normal accounting procedures nor by a typical billing audit. This cash erosion will not create a sudden shift or decline in your P & L statements to alert you. Our expert analysts will itemize, analyze, evaluate and make recommendations to improve your telecommunications environment for greater cost efficiency.

---

### 1) We itemize all services and fees:

- A) POTS Lines
- B) Trunk Lines
- C) Call Forwarding, Call Waiting, Caller ID, sub accounts etc...
- D) Point to Point Circuits- for voice/data
- E) Point to Point of Presence (POP) Circuits
- F) Mileage Charges
- G) Equipment Charges
- H) Erroneous services

### 3) We evaluate alternative services to determine which is most cost effective:

- A) Use DID trunks to replace POTS lines to create savings
- B) T-1 provisioned with DID service can reduce costs
- C) Will consolidating hunt groups create savings by eliminating POTS?
- D) Will consolidating accounts create large discounts?
- E) Eliminating any erroneous charges

### 2) We determine the operation of each and every service you are paying for:

- A) **How** is the service being used?
- B) **Why** is the service being used?
- C) **What** is the service being used for?
- D) Is the service cost effective?
- E) Are there cost effective services to replace it?
- F) Are Costs Correct?

### 4) After our analysis is complete the findings are presented in the form of recommendations:

- A) The following POTS line is not connected
- B) The following trunk lines are connected but are never accessed
- C) Eliminate unnecessary call waiting, caller ID, etc.
- D) Program software in telephone system to route calls over Point to Point circuits
- E) Implement discounted calling plans on accounts
- F) Submit claim/obtain refund for erroneous charges
- G) Breakaway Services can have an in-depth color Telecom map developed detailing the location and operation of each and every service within your entire Telecom network

---

*Our Cost Efficiency Analysis is performed on a contingency basis. We are compensated only after all changes have been approved, implemented, and a savings has been successfully realized by your organization.*
